

Quick Guide

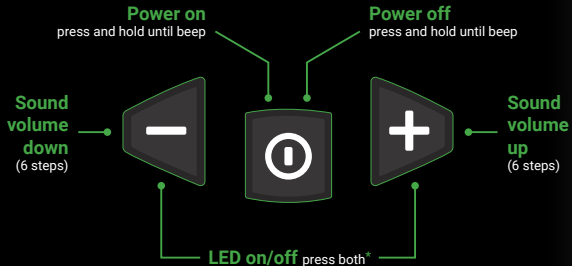

Sordin Supreme Pro-X, Pro-X LED

SORDIN

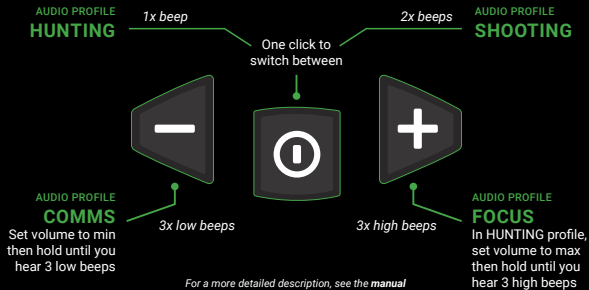

Sordin **HEAR²**
HIGH END AUDIO REPRODUCTION

Basic settings

* Sordin Supreme Pro-X LED models only

Switch between audio profiles

HUNTING

Hunting is the main audio profile for general purposes. The sound image is optimized for a normal hunting day, balancing clear ambient sound such as speech with comfortable low-noise audio.

SHOOTING

Shooting is a comfort profile with lower gain and a narrower audible frequency spectrum. Perfect when normal situational awareness is sufficient, e.g. in shooting training at the range.

FOCUS

Focus is your full-alert profile. It features high amplification and a wider frequency spectrum for highest situational awareness. Use this audio profile e.g. in the hunting tower to shapen your senses before your shot.

COMMS

In Comms, ambient sound is deactivated and your hearing protector uses passive protection only. However, the 3.5-mm AUX input is active allowing for clear communication even in noisy environments.
